

A hand holding a glowing lightbulb in a field at sunset. The lightbulb is held up, and its glow is reflected in the sunset sky. The field is filled with tall grasses, and the sun is setting in the background, creating a warm, golden light. The image is split into two main sections: a green geometric shape on the left and a photograph on the right.

# Increasing Stakeholder Expectations

Demanding the CEO to Take Action

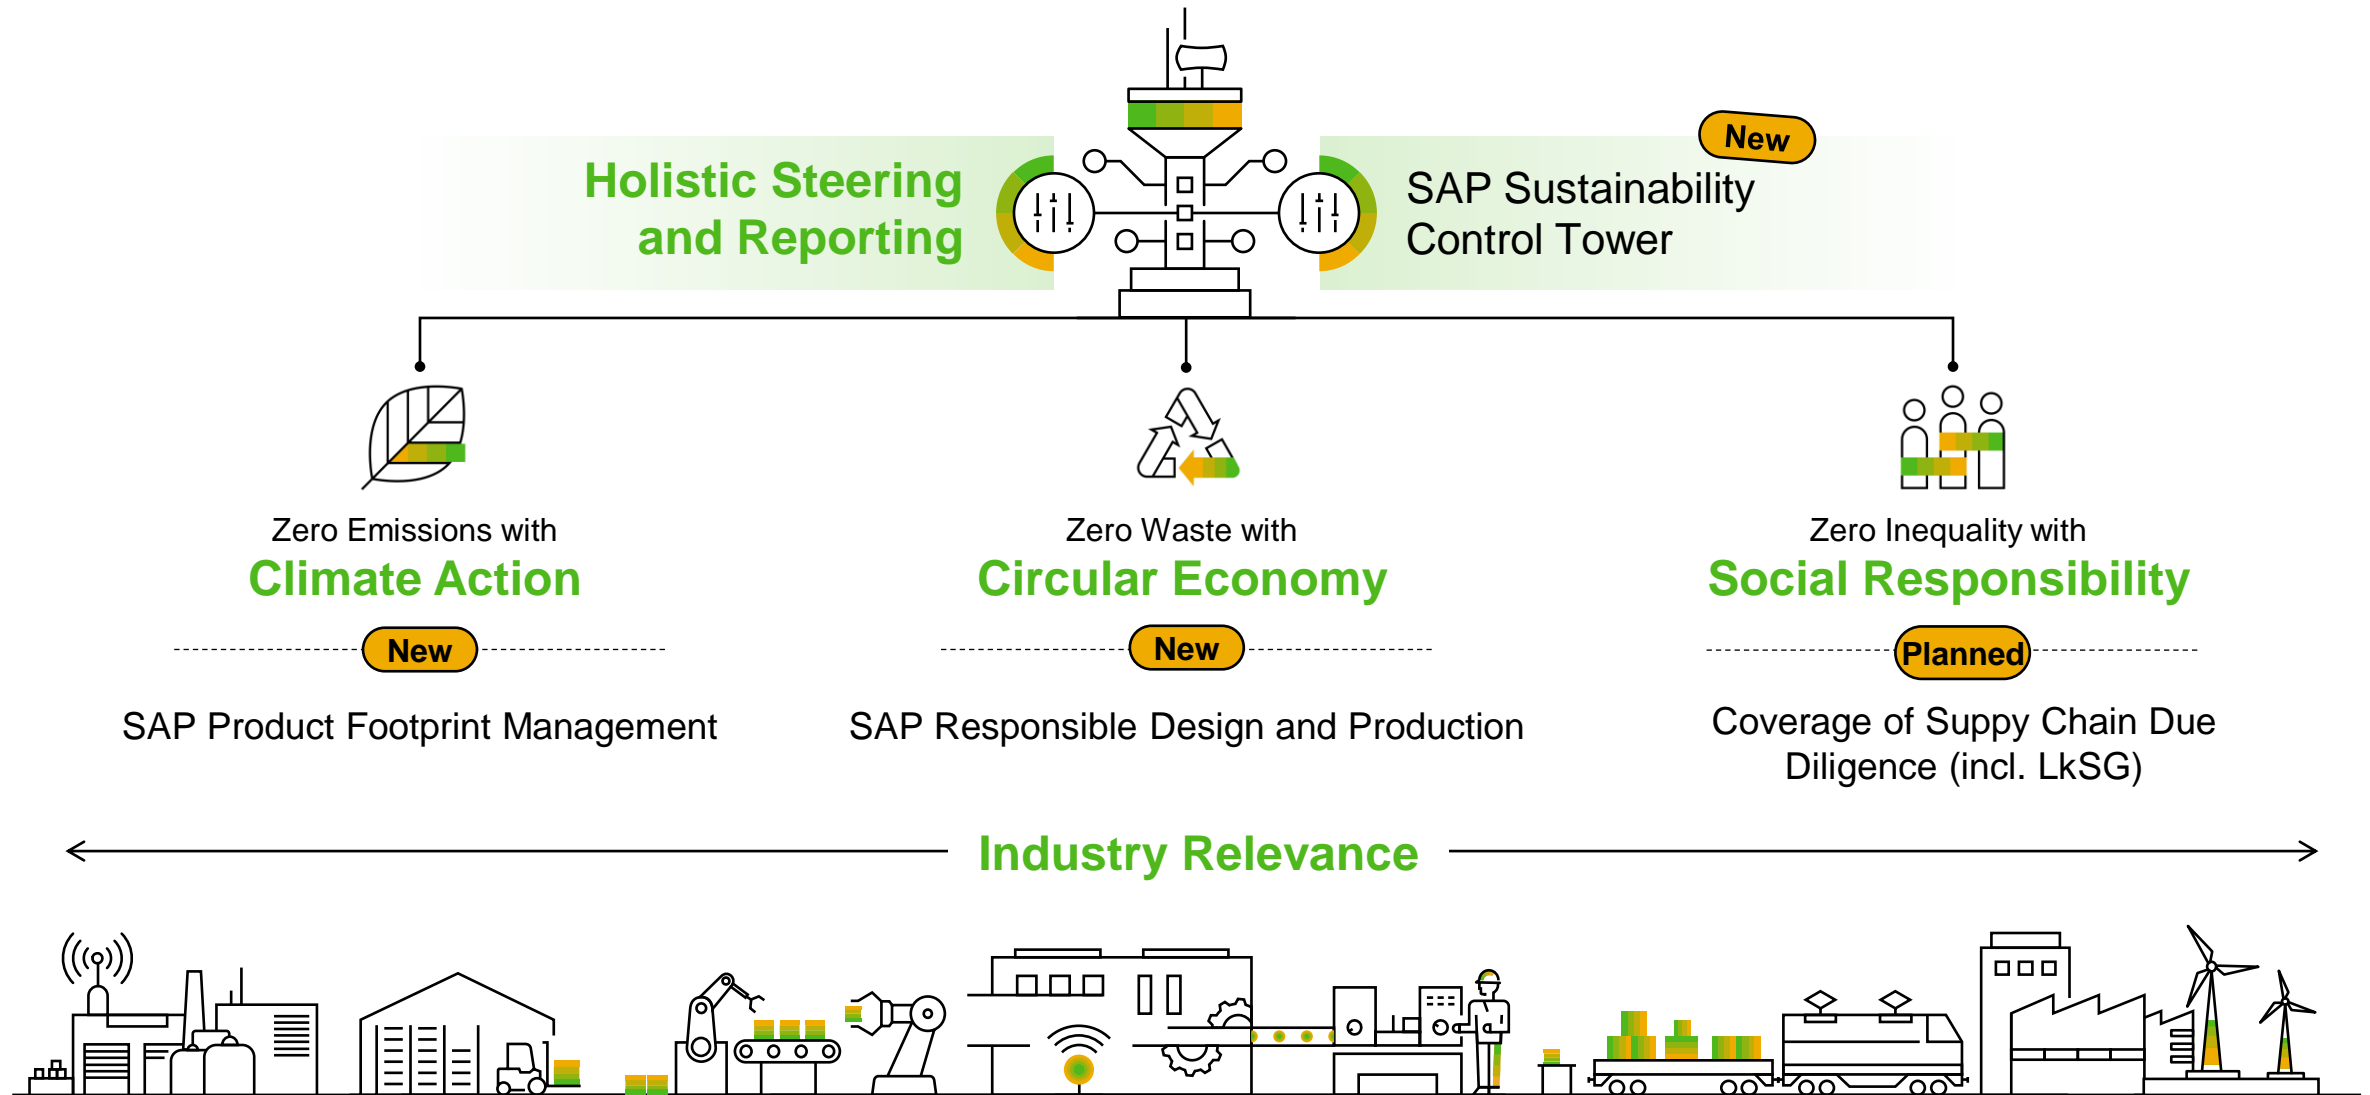

# Our Vision Is Clear

Embedding sustainability into business processes enabled by  
SAP Cloud for Sustainable Enterprises

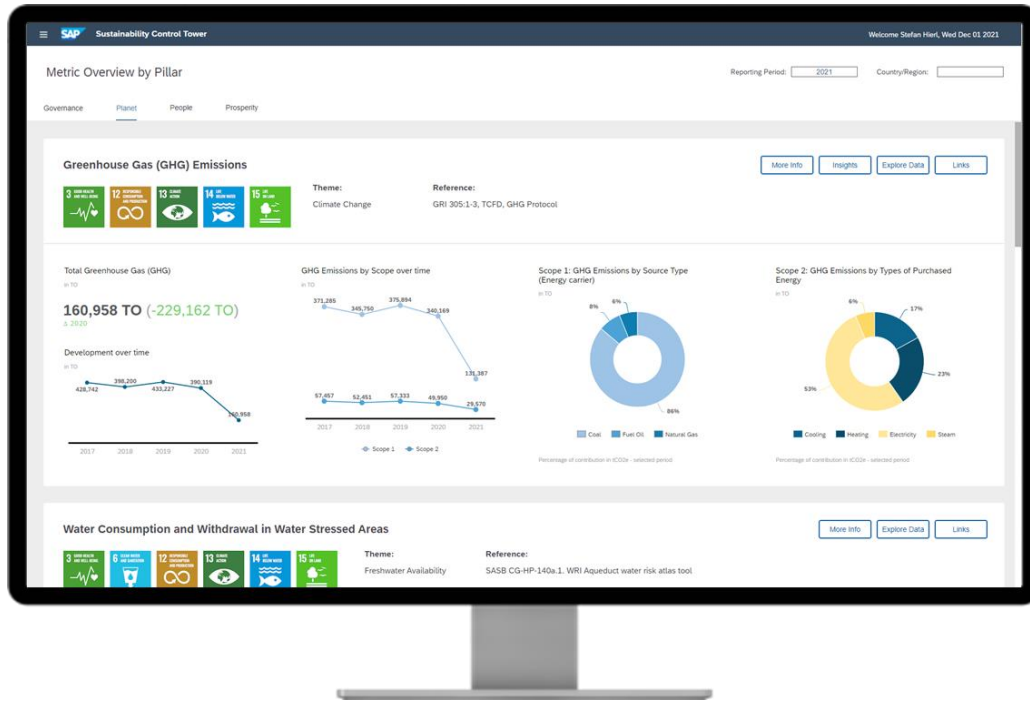

# Focus Areas for SAP Cloud for Sustainable Enterprises

New generation of products. Evolution of existing ones.

# SAP® Sustainability Control Tower

Reach your sustainability ambitions with holistic, enterprise-wide sustainability performance management.

## In a Nutshell

Support customers to automate their integrated reporting and performance management by enabling transparency across financial, operational, compliance, environmental and social key figures to understand their impact on environment, society and communities.

## OBJECTIVE

- Gain trust by establishing a robust and auditable ESG reporting.
- Drive action by setting targets, monitor progress and gain actionable insights from granular, consistent and dependable sustainability data.

## CAPABILITIES

- Source and integrate data from SAP and non-SAP applications into a central sustainability data warehouse
- Harmonize, allocate and calculate granular sustainability key figures along established structures from Finance HR, real estate and operations
- Analyze and report sustainability data according to established ESG Reporting Frameworks
- Drive targeted action by giving business areas a dedicated view on their sustainability performance

## Supporting Applications

SAP Sustainability Control Tower

## Benefits

### Efficient Reporting:

Automated, timely and auditable ESG reporting against a variety of regulations and standards as well as ratings.

### Actionable Insights:

Establish interrelationships between financial, operational and sustainability performance. Analyze data at a level of granularity that allows decision making and targeted actions for business units, departments and locations

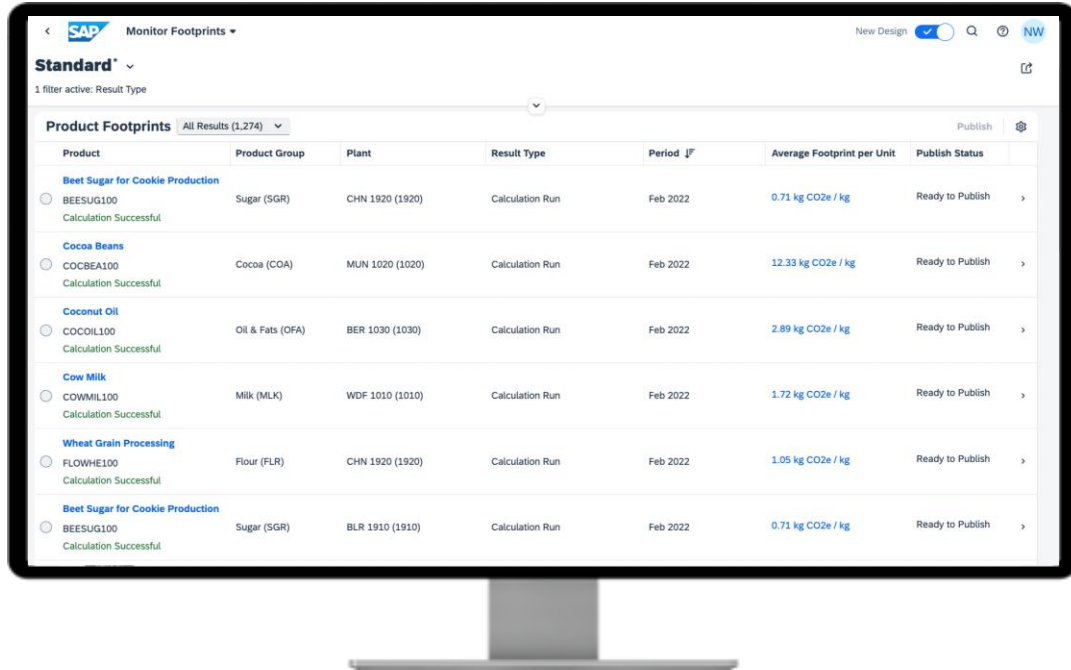

### Holistic Steering:

Realize a holistic understanding and performance management across social, environmental and financial indicators

# SAP Product Footprint Management

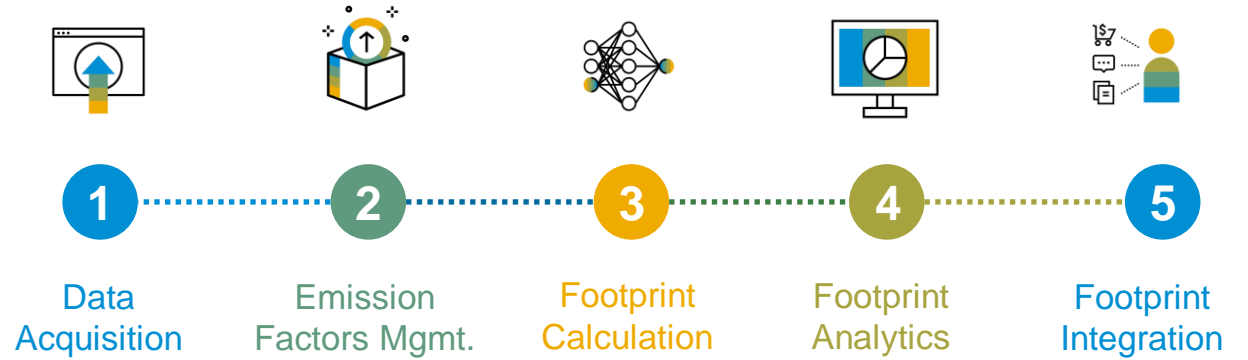

The screenshot displays the SAP Monitor Footprints interface. At the top, there's a header with 'SAP Monitor Footprints', a 'New Design' toggle, and search filters. Below this, a 'Standard' dropdown and a filter for 'Result Type' are visible. The main section is titled 'Product Footprints' with a dropdown for 'All Results (1,274)'. A 'Publish' button is on the right. The table below lists various products with their groups, plants, result types, periods, average footprints, and publish status.

Product	Product Group	Plant	Result Type	Period	Average Footprint per Unit	Publish Status
Beet Sugar for Cookie Production						
BEESUG100	Sugar (SGR)	CHN 1920 (1920)	Calculation Run	Feb 2022	0.71 kg CO2e / kg	Ready to Publish
Calculation Successful						
Cocoa Beans						
COCBEA100	Cocoa (COA)	MUN 1020 (1020)	Calculation Run	Feb 2022	12.33 kg CO2e / kg	Ready to Publish
Calculation Successful						
Coconut Oil						
COCOIL100	Oil & Fats (OFA)	BER 1030 (1030)	Calculation Run	Feb 2022	2.89 kg CO2e / kg	Ready to Publish
Calculation Successful						
Cow Milk						
COWMIL100	Milk (MLK)	WDF 1010 (1010)	Calculation Run	Feb 2022	1.72 kg CO2e / kg	Ready to Publish
Calculation Successful						
Wheat Grain Processing						
FLOWHE100	Flour (FLR)	CHN 1920 (1920)	Calculation Run	Feb 2022	1.05 kg CO2e / kg	Ready to Publish
Calculation Successful						
Beet Sugar for Cookie Production						
BEESUG100	Sugar (SGR)	BLR 1910 (1910)	Calculation Run	Feb 2022	0.71 kg CO2e / kg	Ready to Publish
Calculation Successful						

Calculate product footprints **at scale** considering the **entire product lifecycle** for **disclosure** and internal **product & process optimization**

## Product Capabilities

## Key Benefits

- Vast reuse of existing business data and structures from SAP systems
- Vast reuse of business logic
- Monthly calculation of all products in the system
- Inbuilt integration back to SAP S/4HANA systems
- Emission factor management to help customers to upload sustainability content

# SAP Responsible Design and Production

## Holistically manage packaging and regulatory risk across global markets and support transition to sustainable portfolio

### In a Nutshell

SAP Responsible Design and Production helps producers manage their EPR obligations and plastic taxes so they can control and eliminate the costs of the downstream waste system and make design changes to eliminate waste.

### OBJECTIVE

Provide tailored intelligence that will enable businesses to keep pace with EPR regulations and plastic taxes, embed circularity principles into core business processes and optimize design for regenerative business.

### CAPABILITIES

- Manage EPR declarations and Materials Taxes in line with latest regulations
- Maintain a global view of progress and support circular design processes.
- Provide transparency and reporting to third party NGOs on Voluntary Agreements.

### INTEGRATION

- S/4 HANA
- PLM
- ECC 6 (requires ABAP plug in)
- CSV/Excel Import

### BENEFITS

#### Reduced Costs

Calculate fees and taxes accurately and implement measures to reduce regulatory exposure.

#### Deliver Commitments

Identify the right trade-offs and enable the strategic portfolio decision making process.

#### Empowered Consumers

Transition to a circular product portfolio and increase consumer engagement through authentic delivery of zero waste commitments.

# SAP® Environment, Health, and Safety

Proactively manage operational risks to protect people and the environment for own operations and plants

## In a Nutshell

SAP Environment, Health, and Safety enables companies to monitor, track and control emissions incl. waste as well as the entire end-to-end incident and health and safety processes.

## OBJECTIVE

- While you need to reduce environment, health and safety risks to foster safe operations you need to keep your business running. At the same time it's getting increasingly important to minimize your company's impact on the environment.
- By doing so you gather automatically relevant data along your operations.

## CAPABILITIES

- Proactively identify, analyse, and mitigate environment, health, and safety risks.
- Detect and resolve safety issues and learn from incidents.
- Measure, track, monitor, and report air, water, and waste emissions.
- Manage operational changes with systematic reviews, risk mitigation, and approvals.

## Software Requirements

- Integrated in SAP S/4HANA onPremise, Private Cloud, Public Cloud and SAP ECC
- Direct process integration with SAP Asset Management, SAP Human Resource Management and Material Management.

## Benefits

### Operational continuity:

Safeguard by preventing production loss due to downtime.

### Safer operations:

Act on hazards before they impact safety through real-time analysis.

### Optimized compliance:

Increase regulatory compliance, gain transparency and reduce associated costs.

## Ensure Product Safety and Compliance Throughout the Entire Product Lifecycle

### In a Nutshell

SAP Product Compliance applications offers complete end-to-end support across all relevant processes: from product development, purchasing and production to sales and distribution. Deploying automated compliance assessment and reporting, customers can mitigate reputational risk, while accelerating time to market.

### Objective

- End-to-end support of product marketability and component compliance, and safety data sheet and label management, as well as dangerous goods management.

### Capabilities

- Centralized management of substance, regulatory, compliance and dangerous goods information in line with legal and customer requirements
- Up-to-date provisioning of the latest regulatory content and automatic verification of products for different compliance requirements
- Automated creation and provisioning of safety data sheets, certificates, labels, and dangerous goods documents

### Supporting Applications

- On SAP S/4HANA®: SAP S/4HANA for product compliance
- On SAP ECC: SAP Product Safety, SAP Product and REACH Compliance

### Benefits

**Cost-effective Compliance:**  
Streamlined and efficient end-to-end compliance processes

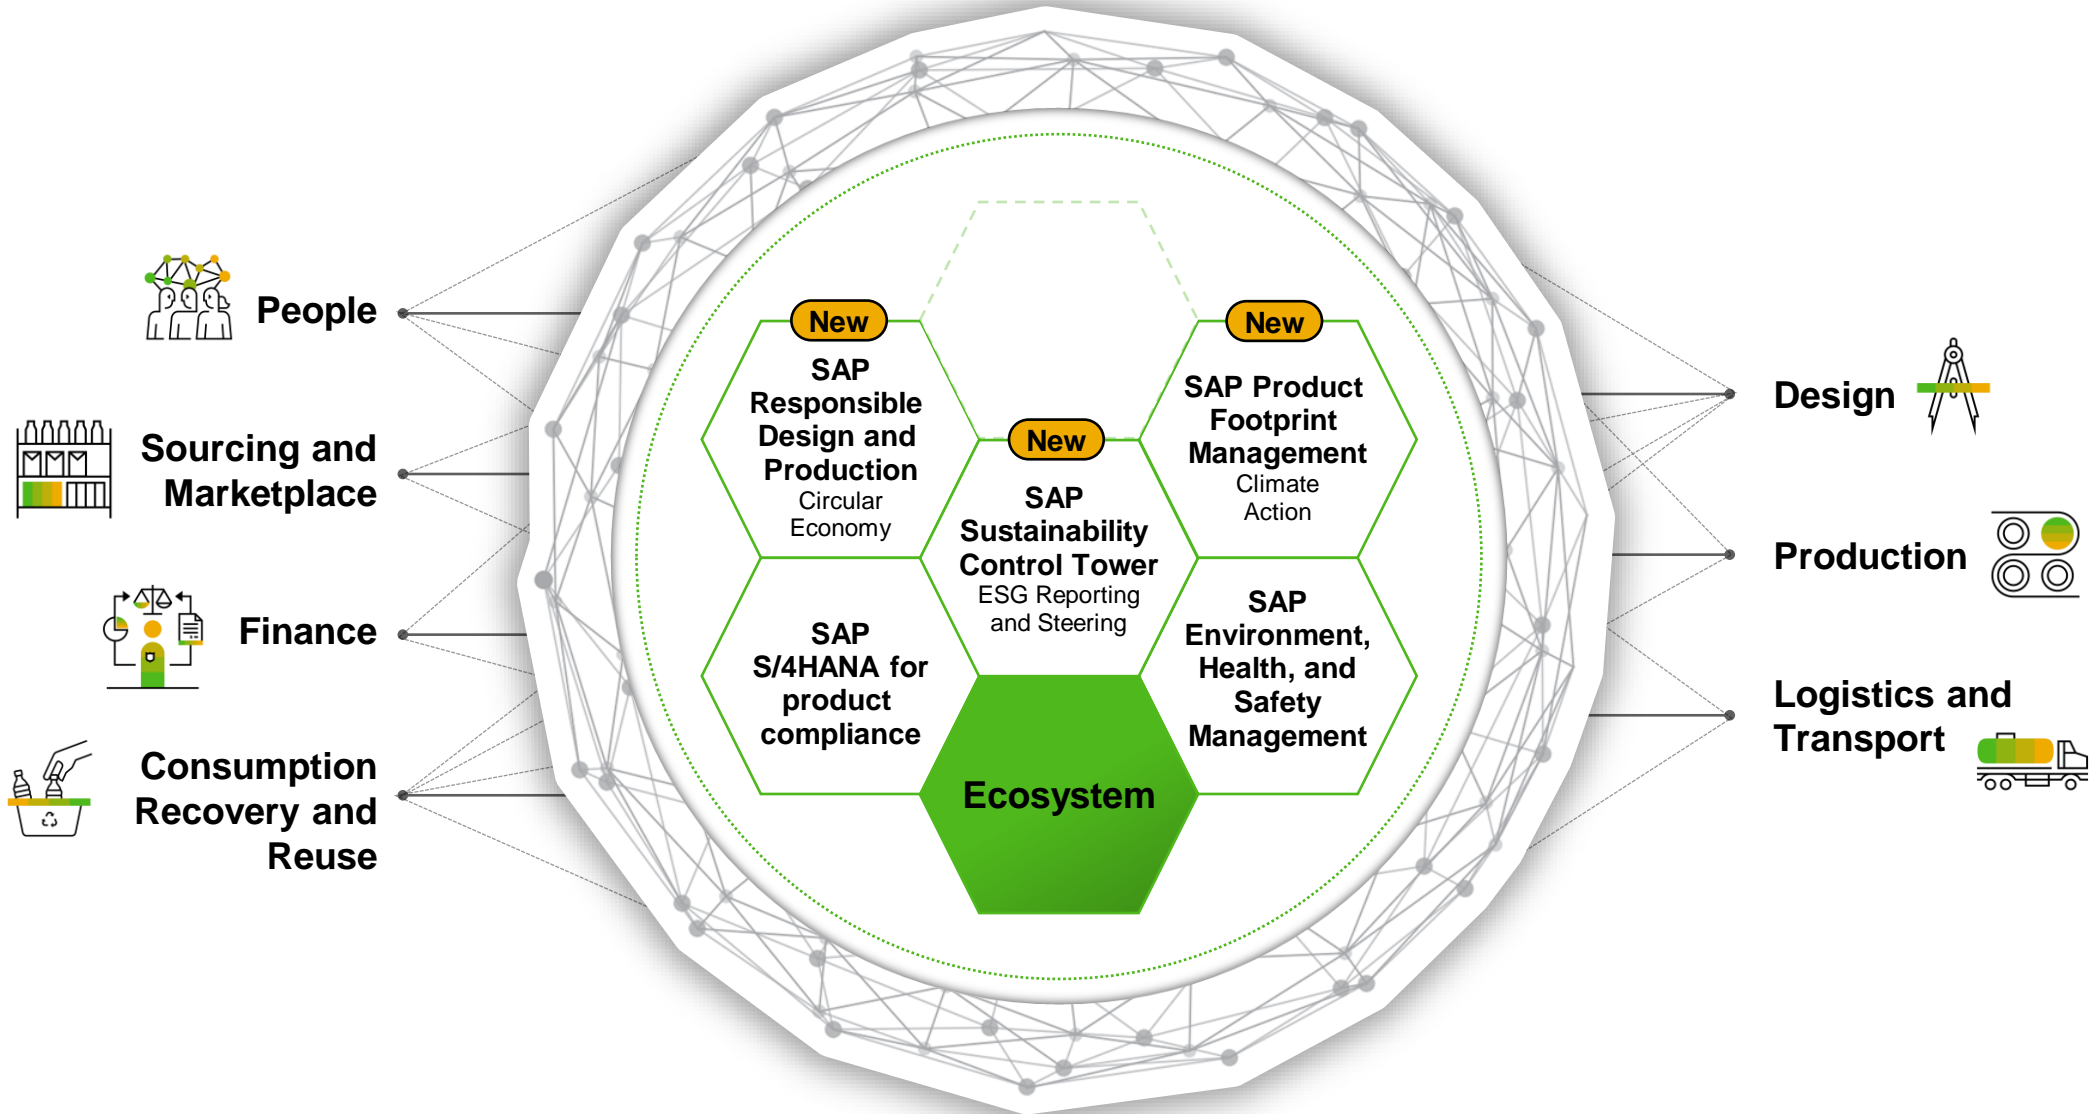

**On-time Delivery:**  
Automated dangerous goods checks and document creation

**Increased Revenues:**  
Comprehensive compliance support enables accelerated product development and introduction

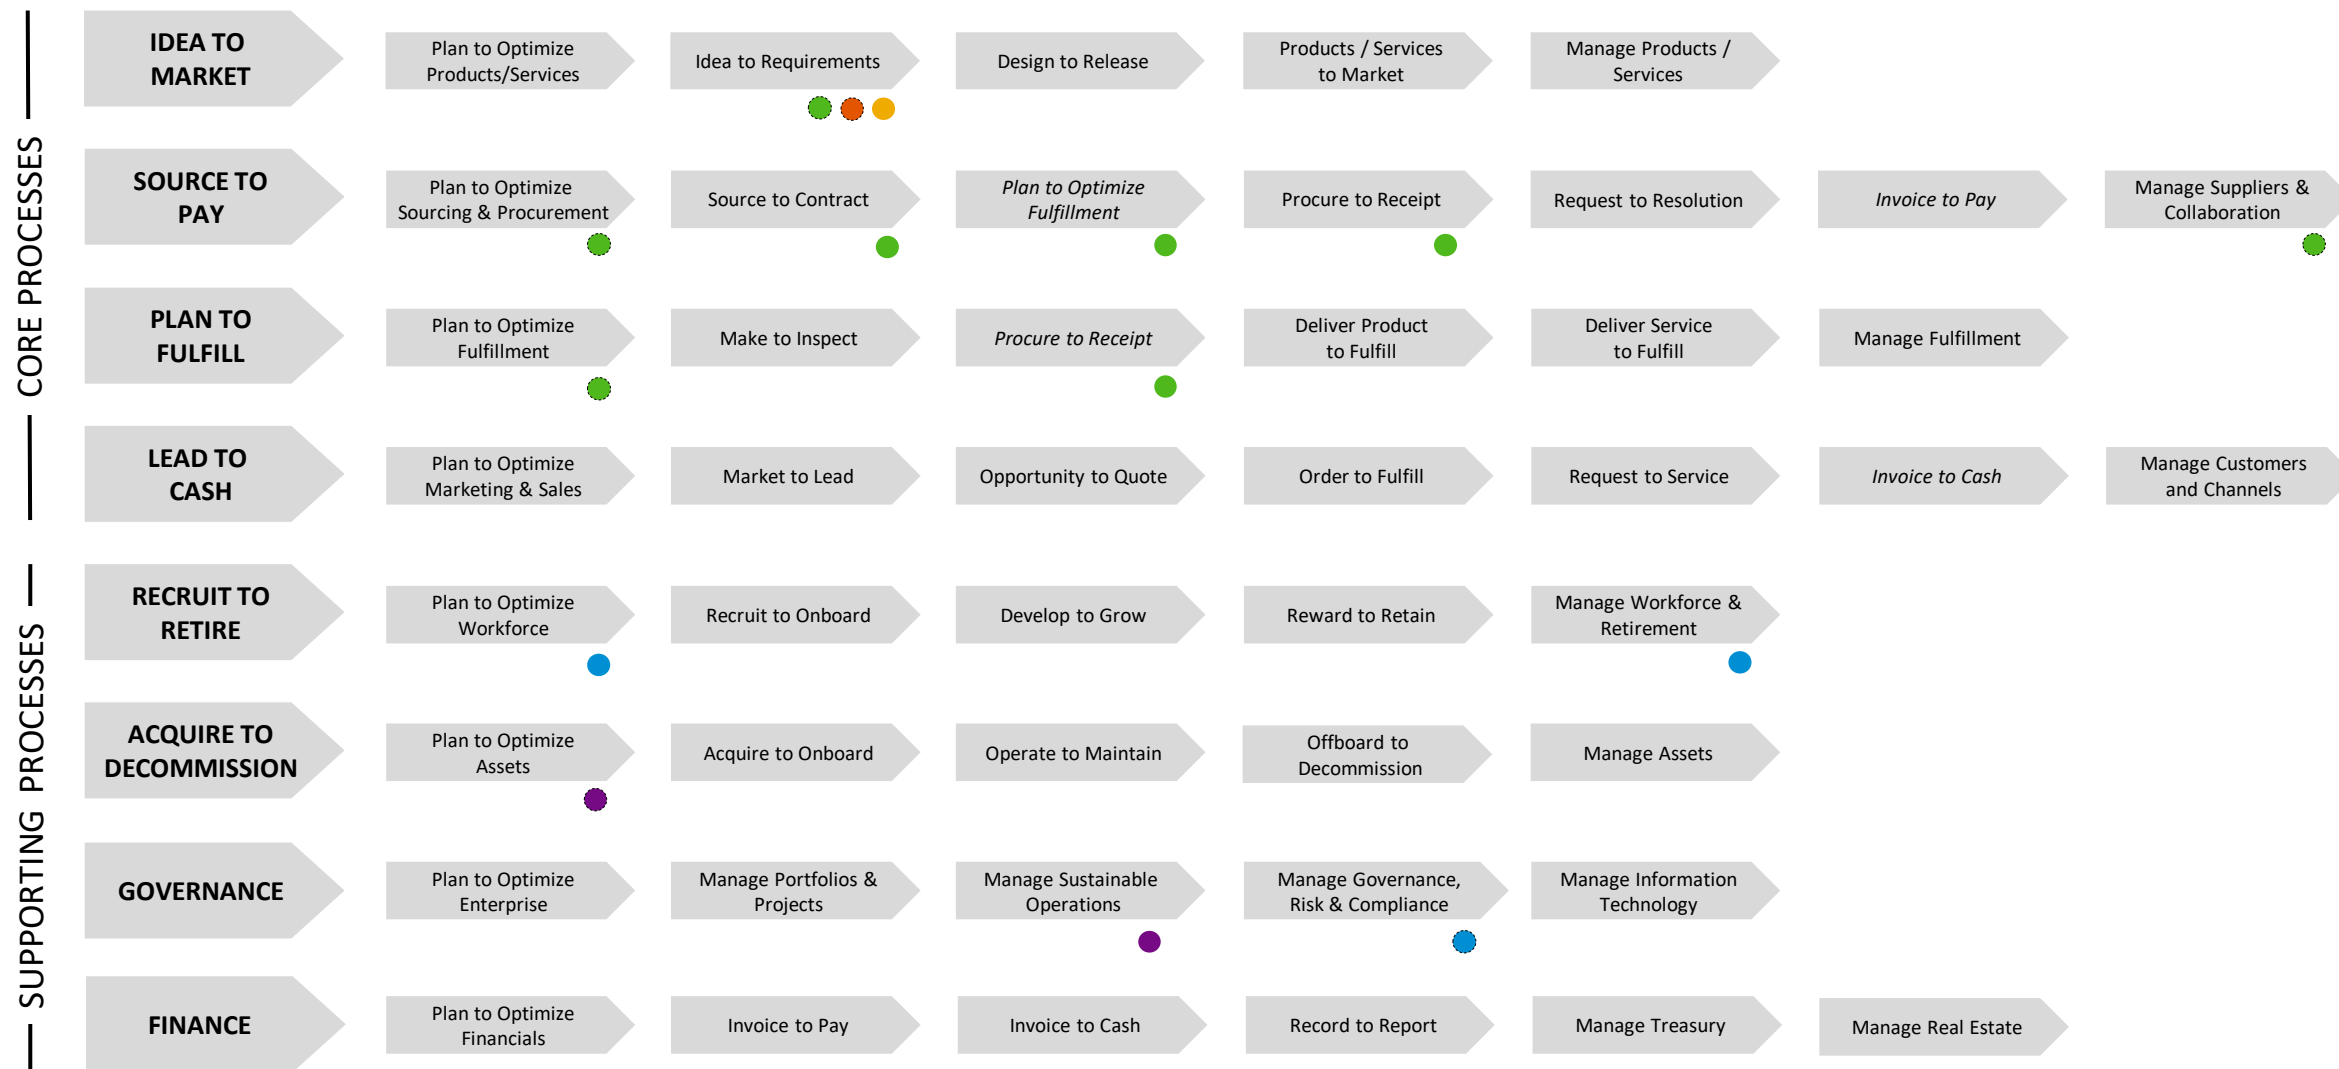

# Enabling the “Green Line” with SAP Cloud for Sustainable Enterprises

Embedded in business processes. Into networks.

## Embedding Sustainability across our End-End Business Processes
